Load swatches from predefined custom colour libraries

You can select from a range of colour libraries—including the PANTONE Process Color System, for example.

- Choose New Color Swatch from the Swatches panel menu.
- Choose Other Library from the Color Mode list, locate the library file, and then click Open.
- Select one or more swatches from the library and click Add. (To exit the dialog box without adding swatches, click OK.)
- When you are done adding swatches, click Done.

Import selected swatches from a file

- Choose New Color Swatch from the Swatches panel menu.
- Choose Other Library from the Color Mode list, and then select the file from which you want to import swatches.
- Click Open.
- Select the swatches you want to import.
- Click OK.

Import all swatches from a file

- From the Swatches panel menu, choose Load Swatches.
- Double-click an InDesign document.
